ATCO GAS REMINDS ALBERTANS TO CALL BEFORE YOU DIG

Avoid hitting a natural gas line and stay safe

EDMONTON, Alberta – Spring is here and so is the risk of hitting a natural gas line. ATCO Gas is working to prevent that.

With homeowners and contractors eager to break ground, ATCO Gas is reminding people to plan ahead and call Alberta One-Call, a free service, at 1.800.242.3447. Calls should be made a minimum 48 hours before digging begins. It's the best way to avoid hitting a natural gas line.

"Safety is paramount at ATCO Gas," said Brian Hahn, President, ATCO Gas. "Our goal is to eliminate gas line hits because anytime a line is hit, there's the potential for tragedy."

Last year, 685 natural gas lines were ruptured or severed in the ATCO Gas service area. In almost half of those incidents, homeowners or contractors did not contact Alberta One-Call to locate the lines.

Locating underground utilities prior to excavation is an important first step. Knowing how to properly expose the marked gas lines is also critical, especially when digging within one metre. To expose the gas line, use the markings as a guide, keep the shovel at a shallow angle and carefully remove small layers of soil until the gas line is uncovered. For more details on how to stay safe while digging, please visit www.atcogas.com.

ATCO Gas distributes natural gas through a network of more than 37,000 kilometres of underground pipes and service lines. The company operates 62 agency offices across Alberta and serves more than one million customers in nearly 300 communities across the province.

ATCO Gas is a wholly-owned subsidiary of Canadian Utilities Limited, part of the ATCO Group of Companies. ATCO Group, with more than 7,500 employees and assets of approximately \$9.9 billion, delivers service excellence and innovative business solutions worldwide with leading companies engaged in Utilities (pipelines, natural gas and electricity transmission and distribution), Energy (power generation, natural gas gathering, processing, storage and liquids extraction), Structures & Logistics (manufacturing, logistics and noise abatement) and Technologies (business systems solutions).
